

APPLICATION NOTE - 33

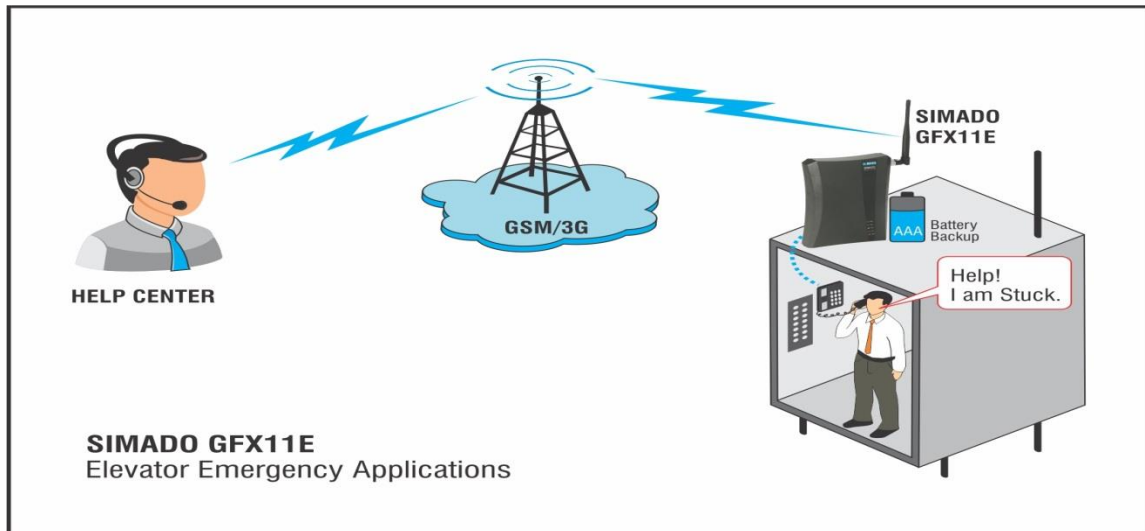

Product: SIMADO GFX11E

Application: GSM FCT for Emergency Applications

Introduction:

SIMADO GFX11E is a Fixed Cellular Terminal (FCT) with built-in battery back-up useful for Power Cut and Emergency Applications. During any alarm situation, caller can quickly connect with emergency service or hotline number just by lifting up the handset. When power fails, GFX11E with battery back-up enables the user to establish a link with the help center. GFX11E can be used in various areas such as elevators, ATMs, parkades, hospitals, shopping malls and senior citizen's homes.

Application Scenario:

- In event of power failure, people stuck in critical conditions need emergency backup solution for seeking rescue from help center
- In similar conditions, SIMADO GFX11E with built-in battery can establish communication link with Help Center and Emergency Services
- Victims can use the telephone connected with GFX11E and use Hotline service or dial Emergency Help Center numbers immediately
- In event of power failure or low battery, GFX11E sends SMS notifications to service center
- Emergency Services such as Fire, Police, Ambulance etc. can be reached even if SIM is not Present

Key Features:

- 1 GSM SIM and 1 FXS Port
- Built-in Battery Back-up
- Hotline Number Support
- Emergency Number Dialing
- Automatic Number Translation
- SMS Notification
- Network Selection
- Signal Strength Indication
- Quad-Band and Tri-Band Support
