

## COSEC Feature Update

### Feature:

COSEC – SATATYA Integration

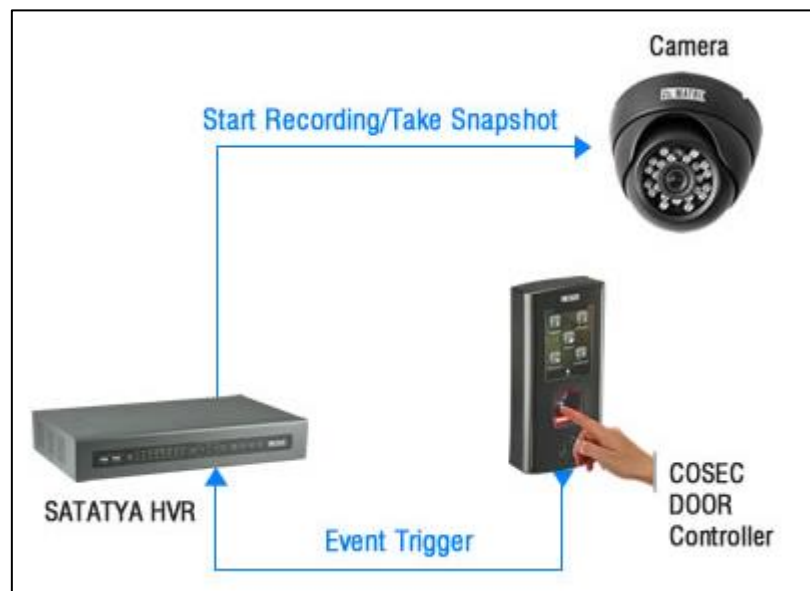

### About COSEC – SATATYA Integration:

Video Surveillance and Access Control & Time-Attendance are integral part of any organisation nowadays. However, organisation can get best out of it when they are integrated together and perform very important functions to enhance organisation security to the next level. Looking at market requirements, Matrix has integrated its Access Control and Time-Attendance solution (COSEC) with Video Surveillance solution (SATATYA) on Ethernet to enhance security and restrict proxy punches of the users.

### Feature Description:

Surveillance camera attached with the recorder or enterprise video management software takes snapshot of the user when he/she punches on any Access Control or Time-Attendance device. It takes snapshot even when user is not allowed or unauthorised to access. Moreover, a detailed report along with the user snapshot gets generated as and when required. The feature performs live streaming about what's happening in the organization and also sends alert during emergency to concern person.

Thus, Ethernet based COSEC - SATATYA integration makes the security of the organization 100% intact.

### Application:

- Organizations having frequent footfalls on day-to-day basis can track in and out accurately

- Organizations where security is the prime importance can make the most out of this solution

**Target User Profile:**

- Banks
- Manufacturing Units
- R&D Center
- Educational Institutions

**Release Date:**

Date	1/10/2015
Release	V1R1
Feature Name	COSEC – SATATYA Integration
Software Version	COSEC V5R4 Onwards
