

COSEC Feature Update

Feature:

COSEC Tracker

About COSEC Tracker:

Matrix COSEC Tracker gives live count of the number of users inside the premises at any given time. This information can be analysed further using various filters such as shift, site, early-in/out, late-in/out, and employees leaves and tour to get more details. Supervisor can use this information to allocate manpower effectively to use the available resources in an efficient way.

Feature Description:

COSEC Tracker is implemented to give live user count information in order to utilize available resources efficiently. COSEC Tracker displays live number of reported as well as not reported employees. Supervisor can apply various filters to get exact information of users in a particular shift or site.

Shift View:

Shift view gives the total shifts scheduled along with number of person who reports as well as fails to report in that particular shift. Further, it shows count of Early-in/out, Late-in/out along with leaves and holidays.

◀ Shift View ▶				
ID	Name	Scheduled	Not Reported	Reported
+ 10	GENERAL 9 30 TO 7 00	0	0	0
+ 11	General Shift	3	3	0
+ G5	MORNING 0730 TO 1630	29	21	8
+ GN	General New	42	42	0
+ 23	Fac General Shift	188	44	144
+ CN	Consultant New	3	3	0
+ GS	HO RnD General Shift	458	118	340
Total		742	249	493

Site View:

Site view helps Admin know the number of people reported to that particular site. The view helps organization dealing with more than one site because the count lets Supervisor know the daily present workforce from a centralized workplace itself.

Site View					
ID	Shift Name	Reported	ID	Site Name	Reported
10	GENERAL 9 30 TO...	0/0	1	Site-1	424
11	General Shift	0/3	2	HO	64
GN	General New	0/42	3	RnD	8
G5	MORNING 0730 T...	8/29			
23	Fac General Shift	144/188			
CN	Consultant New	0/3			
GS	HO RnD General S...	340/458			
Total		496/742	Total		496

Who's IN View:

Who's IN View gives the detail about a particular site and number of people presently working on that site. This view lets Admin know the current status of the site which helps during the time of emergency.

Who's IN View		
ID	Site Name	Who's IN
1	Site-1	458
2	HO	54
3	RnD	7
Total		519

Application:

- Organizations having more than one working shift can benefit the most since supervisors can track the live count of human resources from a single window.
- Getting to know the movements of resources in real-time helps Supervisor to diversify the work in correct manner resulting in increased efficiency of the organization.

Target User Profile:

- Manufacturing Unit
- Security Cabin
- Corporate Office Receptions
- Construction Sites
