

COSEC Feature Update

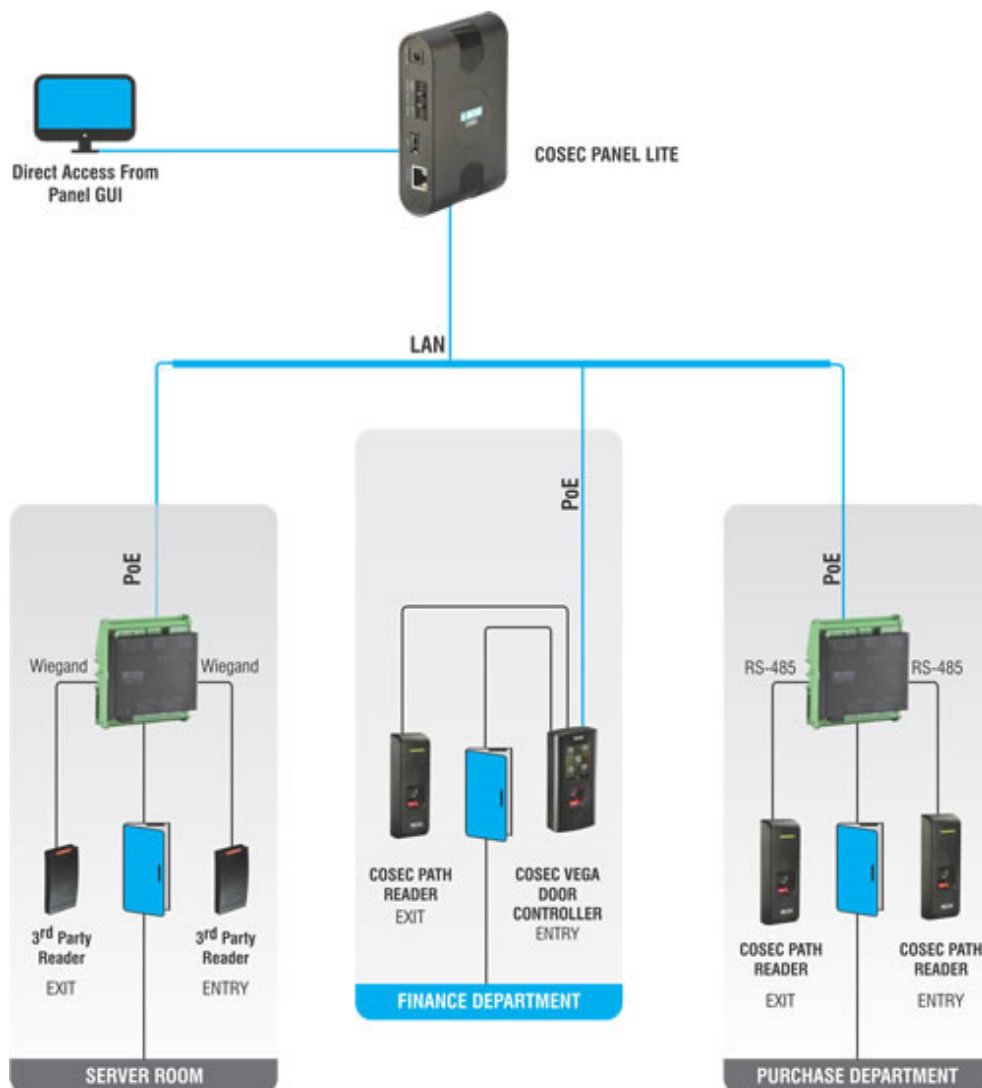

Feature:

COSEC Standalone Access Control Solution

Feature Summary:

Standalone Access Control solution doesn't require a web-based or network architecture. It is completely independent and works on PoE. Access Control features are built in the software itself and user needs to configure device, features from that mode itself. Typically, used in SOHO and SME where there is single location and requires built-in Access Control features.

Picture below shows COSEC Access Control deployment in a single location having 3 separate areas. COSEC door controllers are connected with COSEC PANEL on LAN using PoE. Admin can monitor devices, define policies and generate reports directly from COSEC PANEL without installing any application software.

Feature Description:

COSEC PANEL LITE works as Standalone Access Control over PoE eliminating server cost and installation. 255 Doors can be configured from single COSEC PANEL LITE itself. Access Control Feature enabled with Standalone mode is as follows:

- User Configuration and Enrolment
- Device Configuration
- Live Monitor from a Single Centralized Place
- 2-Person Rule
- Access Route
- First-In User Rule
- Dashboard
- Anti-pass back, and many more....

Components Required:

- COSEC PANEL LITE V2
- COSEC ARC
- COSEC door Controllers
- COSEC Readers / 3rd Party Wiegand readers

Application:

- Effective use for SOHO and SME where the Location is single location
- 25+ rich Access Control feature gets configured from a single Monitor Cost Effective Solution with no server required over minimal Installation cost

Features and Benefits:

Features	Benefits
Controls Up to 255 Doors from a Single IP Panel	Eliminate Need for Multiple Panels
Leverage IP Technology	Standard structured Cabling
Connect Existing 3 rd Party Readers	Protect Investment in Existing Readers
PoE Door Controller for Powering Readers and Lock	Simplified Installation
Standalone Operation without Server	Eliminate Server Cost
Scalable for Future Expansion	Optimum Investment

Target User Profile:

- SMB and SME looking for cost effective Access Control Solution
